    <!-- Introduction about the Course -->
    <table>
<td>
    <p style="font-size: 20px;">MCA stands for Master of Computer Applications, a
postgraduate<br>
       course designed to provide students with advanced skills in computer <br>
       applications and programming. The former two-year degree helps to meet the<br>
       growing demand for skilled IT professionals<br></p>

    <p style="font-size: 20px;">The MCA program builds a strong foundation in computer
programming, <br>
       software development, and computer applications. It covers various topics, <br>
       including computer architecture, operating systems, database management, <br>
       software engineering, programming languages, and web development. <br>
       The program also emphasizes developing analytical and problem-solving <br>
       skills crucial for success in the IT industry.<br></p>

    <p style="font-size: 20px;">The MCA program provides students with practical computer
programming <br>
       and application development knowledge. Students learn to develop computer <br>
       programs and application software using programming languages such as Java, <br>
       Python, C++, and more. They also understand Developing Web Applications,  <br>
       Database Management Systems And Operating Systems. The program also focuses
<br>

       on emerging technologies such as machine learning, artificial intelligence, <br>
       and blockchain, transforming the IT industry.<br></p>
